Multifunctional LCD Meter

The large, easy-to-see Multifunctional LCD Meter lets the operator check on all aspects of operational status at a glance. The many functions such as the Speedometer, Self-diagnosis System, PIN Access and Service Reminder System ease truck operation and maintenance.

Power/Eco Selector (Standard on ECCS models)

A quick press of the switch to ECO mode provides low noise, a 17% reduction in fuel consumption* and reduction of tire wear compared to POWER mode.

*Nissan Forklift figures
*Performance figures may vary depending on the actual working conditions.

Speed Selector (Option for ECCS models)

Select maximum speed settings based on operator skill level, or the truck operation characteristics of your operations.

Steering Synchronizer (Option)

A sensor checks the steering and tire angle so the steering knob always returns to original position. This function helps ensure the accurate and consistent coordination of steering wheel and tires, for precise steering.

Tilt Leveling System (Option)

A simple press of a button on the mast control lever brings the forks automatically to the horizontal position—a great aid for new operators.

FINGERTIP Control Lever (Option)

The optional fingertip control system uses electro-hydraulic levers for control of travel direction, horn, tilt and lift operations with just a slight touch of the finger, providing greater ergonomics and productivity. Both single and double control levers are available.
(Available on 2.0 and 2.5 ton models with 2W and 3F masts.)
