

Blade Truck Mounted Attenuator

Ultimate impact protection

Manufactured by European based company Verdegro, the Blade Truck Mounted Attenuator (TMA) is engineered to safely and effectively minimise the risk of serious injury and damages in the event of a vehicle collision.

The Blade TMA is uniquely constructed with 12 blades and ideal for use on motorways, country roads or anywhere with risk of a vehicle crashing into a workzone. Easy to operate and fully equipped with warning signals, it offers the ultimate package of protection, comfort and value for investment.

Adheres to industry standards

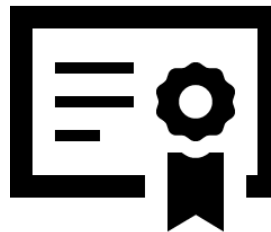

Tested and approved using the Manual for Assessing Safety Hardware (MASH) standards, the Blade TMA can safely absorb the impact of errant vehicles travelling at 100km/hr. MASH approval ensures that the Blade TMA will continue to be recommended by the Austroads Safety Barrier Assessment Panel (ASBAP) after changes to national industry recommendations come into effect on 31 December 2020.

**MASH Crash
Tested and
Approved**

The only MASH approved TMA in Australia measured with a Roll Ahead Distance. Useful metrics to ensure the vehicle will not roll into your workzone upon impact.

**Certified to Service
and Repair**

Our sister company are certified service and repair partners of the Blade TMA. We ensure the highest level of safety and compliance.

Unlimited Idling Hours

The Blade TMA is mounted to the IVECO Eurocargo cab chassis. Users enjoy unlimited IVECO idling hours warranty.

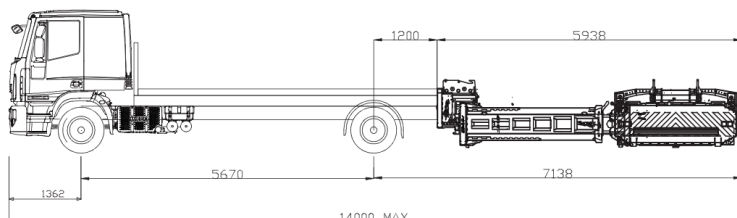

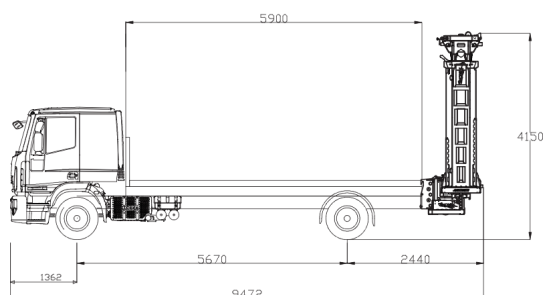

Real crash on an Australian road where the Blade TMA helped avoid serious injury.

Blade TMA

Product Information

- » Safely absorb crashes at speeds up to 100km/hr
- » Lightweight aluminium crash cushion
- » Extra crash length - 12 blades
- » Galvanised steel support structure
- » Hydraulic lifting frame
- » CAN-Bus controlled system
- » Mounted to IVECO Eurocargo cab chassis
- » IVECO unlimited idling hours warranty

Testing and Accreditation

The Blade TMA is designed to ensure the highest levels of safety and compliance while providing fantastic value for your investment.

When it comes to safety and compliance regulations, know that you are covered when you hire a Blade TMA from Uphire.

- » **National Heavy Vehicle Regulator (NHVR)**
Built to required AS3845.2.2017, VSG11 & VSG12 standards. You'll also receive a NHVR report which remains in the truck at all times.

- » **Manual for Assessing Safety Hardware (MASH)**
The Blade TMA has been MASH crash tested and approved with a Roll Ahead Distance of 7.6m. MASH testing supersedes the 20-year-old NCHRP-350 recommended test.

- » **Austroads Safety Barrier Assessment Panel (ASBAP)**
Recommended for acceptance by the national industry body. The Blade TMA will continue to be recommended after industry changes come into effect from 31 December 2020.

- » **IVECO Manufacturer Approval**
The Eurocargo cab chassis is tested, and approved to carry the Blade TMA. This ensures optimal product performance.
